

## Cookies

### What are cookies?

To make this site work properly, we sometimes place small data files called cookies on your device. Most big websites do this too. A cookie is a small text file that a website saves on your computer or mobile device when you visit the site. It enables the website to remember your actions and preferences (such as login, language, font size and other display preferences) over some time, so you don't have to keep re-entering them whenever you come back to the site or browse from one page to another.

### How do we use cookies?

We use cookies to:

- store Google Analytics data from visitors
- remember your language settings or browser language for each business unit
- remember that you accepted the cookie notice

### How to control cookies?

You can control and/or delete cookies as you wish – for details, see [www.aboutcookies.org](http://www.aboutcookies.org). You can delete all cookies that are already on your computer and you can set most browsers to prevent them from being placed. If you do this, however, you may have to manually adjust some preferences every time you visit a site and some services and functionalities may not work.
